ANNOUNCEMENTS.

For Congress.

We are authorized to announce
MAG. HENRY H. DENMARK
of Washington, D. C., has filed for Congress
from the Third Congressional district, subject
to the action of the Democratic primary to be
held in August, 1918.

*Our Country! In her intercourse with
foreign nations may she always be in the
right; but our country, right or wrong.*
Stephen Decatur.

There are no unimportant fronts
in this war and every rear must be
well guarded.

Muddling through is, let us hope,
a closed incident. Smashing through
is the present need.

Most of us are forgetting even to
ask when the war will end. It is the
essential victory for liberty that our
hearts and minds are set upon.

FORCES that are fighting and liv-
ing for liberty may expect every
kind of attack, open and covert, sly,
bold insidious and ponderous, until
the end.

By carefully reading President
Wilson's few pointed remarks Pro-
sianism can get the real reasons why
it is not popular on this earth, re-
gardless of its alleged private under-
standings with heaven.

When the war broke out in 1914
the air was filled with lies and ru-
mors of lies, most of them concerning
great disasters to the British fleet
that never occurred. The fleet is
still on watch and so are the liars.

Food Conservation.

I'm cutting out fat living since
folks have let me know that eating
pates is giving much comfort to the
foe. I stay at ducks and geese and
eat things I abhor since told that
fats and greases are needed in the
war. My aunt, who is a dandy, is
helping on the cause; she isn't eating
candy or ice cream as she was; her
diet will improve her, as it will surely
aid all girls who hoope with Hoover
and join the food parade. And I am
feeling finer than I have felt
for years; I've been an ardent diner,
consuming roasted steers, I've cleaned
the plate and platter with glutinous
delight and kept on getting fatter
until I was a sight. But now I'm
eating sawdust and boiled excelsior,
to help, in manner modest, our
country with the war. And I am
feeling fitter than since I was a lad;
all day I sing and twitter, I am so
readily glad. From here to far
Vancouver the fat men bear their
load, and they should hoope with
Hoover since I have shown the
road. This fact will bear repeating
in this most crucial time; we're all
too fond of eating when stuffing is a
crime. And so, in language moving,
I do beseech, my friends, that
you will do your hooing as Hoover
recommends. WALT MASON.

Double Your Christmas Seal Purchases.

Every man, woman and child is
being asked to triple the amount of
their Red Cross Seal purchases this
year. If they bought a hundred
Seals last year, they are being asked
to buy three hundred this year, as
the annual fund to be raised must be
increased from the 1916 total of
\$1,000,000 to \$3,000,000.

Advertising circulars, post cards
and letters are being sent out to aid
in the sale of Seals. Upwards of
2,000,000 personal letters have been
written, and an army of fully 500,
000 workers, most of them volunteers,
are busy boozing the campaign.

Few people who buy the little
messages of Christmas cheer realize
that more than 1,500 anti-tuberculosis
associations of the country derive
their chief support from Red
Cross Christmas Seals.

The Temperature at Home.

Food Administrator Hoover is
wise in recommending that in Ameri-
can homes a temperature no higher
than 68 degrees Fahrenheit be main-
tained. Although this suggestion
was made in order to save fuel, it
will also save doctors' bills. The
doctors will not mind, for they are
worked nearly to death anyway in
winter.

It is an almost universal rule in
this country to keep the homes too
warm in cold weather. There would
be no great harm in the custom if we
did not commonly shut out the fresh
air and compel our lungs to breathe
not only contaminated air but air
that is extraordinarily dry. It is a
scientific fact that the air in most
of our dwellings in winter is very
much drier than the air of the Sahara
desert. Our lungs are not made to
endure this excessive dryness. Bron-
chial and throat troubles are the re-
sult.

With a temperature of 68 degrees
the air is appreciable more moist
than at 80 degrees, so that the
furniture does not fall apart and the
binding on the books do not dry up.
Also the lungs of the family are
healthier.

Food Administrator Hoover thus
becomes to a considerable extent a
national health conservator.

There are millions of happy Vict-
rola families throughout the world,
more than 150 of them in Muhlen-
berg. Now would be a fine time
for you to join the charmed throng
and have delights for Christmas,
and next year, and all festivals and
years to come. Anyway, see the
instruments and enjoy a demonstra-
tion at Roark's.

Weather Forecast for Week.

Forecast for the week beginning
Sunday Dec. 9, 1917. For Ohio
valley and Tennessee: Fair, cold
probably without decided changes.
Temperature will moderate some-
what after Sunday.

Right in your home you can have

No News from the Soldier Means That

Although the failure to receive let-
ters from men in the service is not
pleasant to relatives and friends at
home the adage "no news is good
news" never was more true than at
present.

The report of every casualty at home or at
road is immediately wired or cabled to officials at
Washington, being relayed from there without loss of time to the
emergency address of the soldier or sailor affected. It is also at once released
for publication in the newspapers. No news of casualties has
ever will be held up.

Any other talking machine may be
had aplenty, at any season, but Vict-
rolas, made in many times greater
quantities than any of them, has
never reached the point where all
demands are met, and at this season
the shortage is very sharp, all over
the world. "There is a reason,"
which Roark can demonstrate to the
delight of anyone.

Teamsters have been getting rough
passage this week, but many of them are
out, as the coal shortage has
made it necessary.

One merchant declares that the
snow has been of one advantage to
him, as no one has pilfered from his

snow fell. He has stored several
pieces of wood and put in powder
chargers, but if they "went off" it
has not kept his kindling from doing
the same thing, but the snow has
stopped the pokers.

You are practicing economy when
you buy a Victrola from Roark, for
the upkeep is nothing. Ask any of the
150 Muhlenberg owners; also
ask owners of other machines what
they are paying for springs and other
repairs, and how much time their
machines are out of service of vari-
ous reasons.

Goods are scarce, to all lines, and
there have already been several dis-
appointed Christmas shoppers, who
were too long in making up their
minds. Merchants are not in position
to get many items, now, and late callers
are going to meet with lessened
selections.

There are going to be more Vict-
rolas sold for Christmas than ever
before. We know, for we already
have reservations made, and have
still more machines, others promis-
ed and many live prospects. Roark.

War Time Proverbs.

Racial wisdom as embodied in
popular proverbs is well worth heed-
ing for help in the conduct of life at
all times. There are many proverbs
especially worth taking to heart in
time of war.

Here are some of these war time
proverbs, which I commend to the

their share toward setting the world
free from the menace of despotic,
autocratic, lawless Hunnish:

Pioneer Business Man Dies.

John F. Poag, aged 65, died at his home on Paradise street at 11:30 o'clock Monday morning, following an illness from a complication of ailments which had for some weeks confined him to his room. He was a native of this city, and had the distinction of being its oldest business man, having been in business for himself here for nearly forty years. Funeral services were held at the home at 1 o'clock Tuesday afternoon, conducted by Rev. Frank, pastor of the Methodist church, deceased having been a member of that congregation. He is survived by two sons, Mr. Harry Poag of Bardwell and Mr. Roscoe Poag of this city. Interment was in the old cemetery, where the body was laid to rest beside that of his wife, who died many years ago.

RED CROSS SEAL FIGURES

440,000,000 Holiday Stickers Already Distributed in United States.

The biggest drive in the history of the Red Cross Christmas Seal movement is being made this year. Already 440,000,000 of the little Christmas stickers have been printed and distributed throughout the United States.

Agents in every state and territory in the Union from Alaska to the Canal Zone and from Porto Rico and Hawaii and even in the far off Philippines have been making demands for the stamps. Through these agents the Seals will be distributed to the local and state anti-tuberculosis associations and to other agencies through which they will be put on sale.

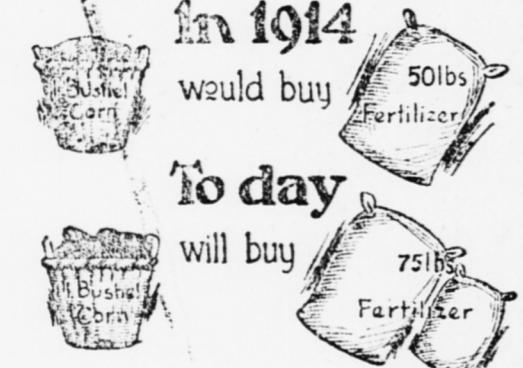

Every effort is being made to stimulate the sale of the Seals this year so the \$3,000,000 fund which is the objective will be realized. The country is carrying into the war and the consequent revelation of the prevalence of tuberculosis and the danger in which the disease has placed our army has added incentive to the campaign.

CROP PRICES AND DOLLAR VALUES

Commodity Prices Are High, but Crops Are Higher—The Dollar Is Cheap.

When is a dollar not a dollar? Relative values shift so rapidly these days that a dollar has no definite value. It is merely a question of how much of the commodity you want, you can get for the commodity you have to exchange—whether that commodity be labor, live stock, corn or wheat.

A bucket of corn will buy more fertilizer now than it would in 1914.

Every purchase must be considered on the basis of relative values rather than dollar values.

The high quotations for spring fertilizers have caused many farmers to ask whether it will be possible to use fertilizers at a profit next season. The answer to this question may be found by a comparison of the relative purchasing power of crops before the war and at the present time.

In 1914 the usual corn fertilizer cost \$21 per ton. Today the same fertilizer costs around \$22 per ton—an increase of 50 per cent. In 1914 corn was worth about 60 cents per bushel, taking the country over. Today it sells at not less than \$1.20 per bushel, on the farm—more than 100 per cent increase.

The same calculation could be made for wheat, potatoes, or almost any other crop (excepting in the case of those fertilizers containing potash).

Each individual farmer has merely to consider whether fertilizers paid before the war; if so they will pay even better now.

WHY FERTILIZER PRICES HAVE ADVANCED.

Cannon and crops use the same food. Six hundred thousand tons of nitrates went to make explosives last year, in the United States alone.

Sulphuric acid necessary for the manufacture of acid phosphate is normally made from Spanish sulphur ores. Submarines have now almost entirely cut off this supply.

Brinstone, used as a substitute source of sulphur, must be transported by rail at great expense from Louisiana and Texas, since the government has found it necessary to commandeer sulphur-carrying boats.

Large quantities of phosphate rock from Florida and Tennessee must now go by rail at high freight rates. Uncle Sam needs the boat.

Higher labor, machinery, coal and supply costs have caused a general advance in all raw materials, varying from 25 to 100 per cent.

Burlap bags which normally cost 10 cents each, now cost 25 cents and are scarce at that.

Labor which was plentiful in 1914 at \$2.00 per day is now almost unobtainable at \$3.50 per day.

There can be but one answer to conditions such as these; namely, high-priced fertilizers.

WHAT CAUSED FOOD SHORTAGE?

Herbert Hoover, U. S. Food Administrator, says there have been two principal reasons to account for the present food shortage. First, the "unkindness of nature," including the late spring, droughts, hurricanes, poor conditions of rainfall, unexpected frosts and periods of intense heat in sections throughout the world.

Second, he gives "reduced productivity of the soil in Europe." Concerning this, Hoover says: "This condition has been brought about by bad management, unskilled work, and lack of fertilizers; and these in turn can be explained by the withdrawal of men from farm and field to army and factory, and the employment on the soil of overworked women, unskilled old men and listless prisoners. Furthermore the vicious submarine has sunk boat after boat filled with nitrates and fertilizers, conspiring to augment the pauperization of the earth, so that reduction in soil productivity was inevitable."

ARMIES ARE NEEDED AT HOME.

If this war is to be won, we shall have to put several armies in the field, the army of soldiers in the trenches, the army of food producers in the furrows, the women's army of food conservers, beating back the attacks of that world-old camp follower of war-famine, and a patriotic army of civilians in the business and political world. — The Bunker-Farmer, Oct. 1917.

FARMERS AND THE WORLD WAR.

The farmer's tools of production in war have become of importance second only to the needs of the army itself. Food production is a patriotic duty, and the farmer is in the second line of defense. Every effort is needed to increase production, to feed our armies and allies. Food prices are forced higher because the demand is increased greatly and the supply is limited.

SUBMARINES AND SOIL FERTILITY

How the War Affects the Farmer's Ability to Produce Bumper Crops.

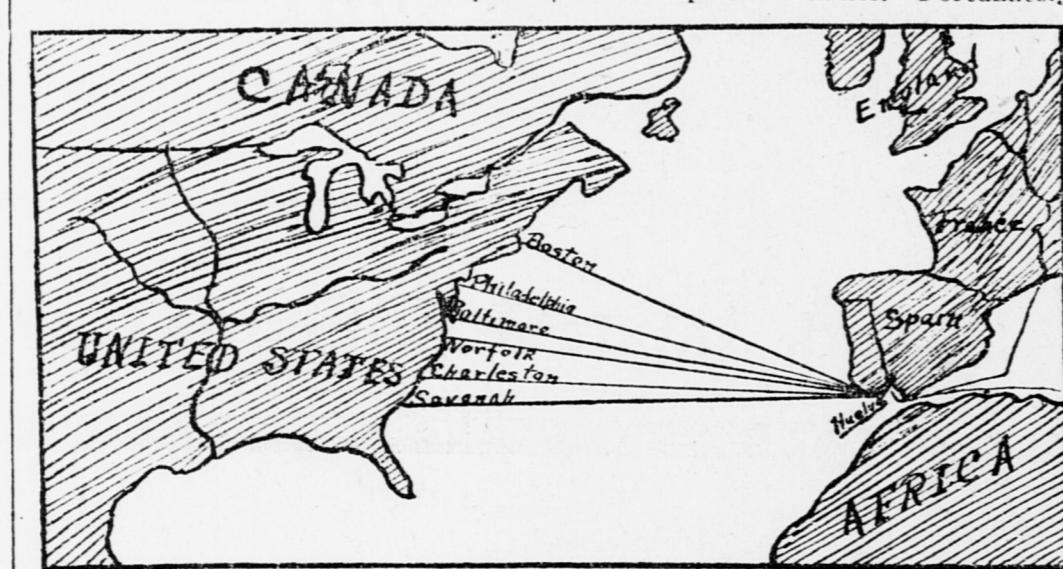

The grip of the scourge of the seas is now, after months of warfare, felt by the American farmer. When the Louisiana went down the whole world shivered with horror—horror at the very savagery of the deed, yet few of us realized at the time that within a comparatively short time the entire world would, in one way or another, be at the mercy of these newest and most savage of all implements of war. Least of all did the American farmer realize that the submarine menace would have any effect whatever on his ability to raise crops and do his bit in the line of food production.

But it has! The war itself in its earliest day cut off supplies of potash. Now the submarine warfare has reduced the supply of Spanish pyrites from which sulphuric acid is made. This sulphuric acid is used in the manufacture of acid phosphate, and also in the making of complete fertilizers. Without it raw rock phosphate

which would usually serve approximately 150,000 acres of corn, or wheat, or of any other cereal crop. It diminishes by this much the ability of the farmer to utilize to advantage his short supply of farm labor, to grow sufficient crops, and at the same time give up to military service the time.

Domestic Pyrites Help.

But this doesn't mean that we shall have no fertilizer. All over the country there are small domestic deposits of pyrites. These can be and are being manufactured into sulphuric acid for fertilizer use and it looks as though there will be enough. But the freight trade on these domestic pyrites is higher than that of Spanish pyrites, and the quality often lower. The cost of labor in mining is always higher, and the cost of handling greater. These facts mean inevitably an increase in the cost of acid phosphate and complete fertilizer. Fortunately,

The route followed by boats carrying pyrites from Spain to the Mediterranean is a favorite lurking place for submarines.

WHY FERTILIZER PRICES HAVE ADVANCED.

Cannon and crops use the same food.

However, this increase in cost is more than balanced by the increase in price which the farmer receives for his crop.

Were this not the case, the American farmer and the American farm would indeed be in a bad way.

THE OVERSEAS ACRE FUND.

The farmers of France are in far worse condition than perhaps you know. They have literally lost everything except their souls. After the last retreat of the German army, the entire countryside was devastated. No living thing remained, no birds, no animals, no trees, no crops—nothing. Farmers were poisoned, all vestige of their former homes and buildings were destroyed.

"Help is needed and needed quickly.

Our funds will be used to buy food, clothing, farming implements, fertilizer, seeds, live stock, building materials, and other necessities as reported to us by the War Relief Clearance House. Every gift will be marked, "Given with gratitude and good will from the farmers of America—through their Overseas Acre Fund."

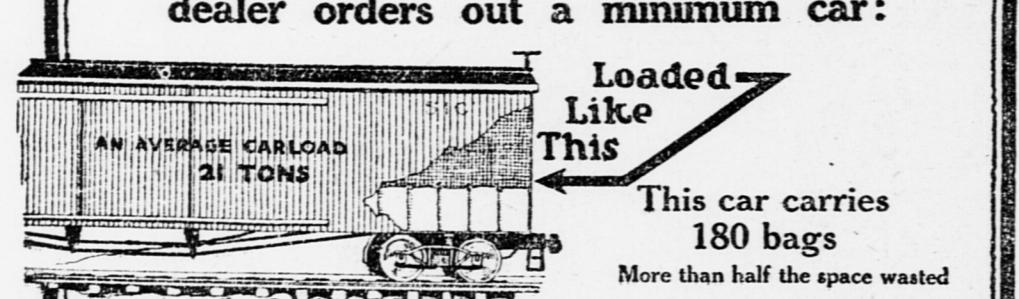

The above statement is from a pamphlet issued by the Overseas Acre Fund, which is carrying on a campaign to help the farmers of France.

Use High-Grade Fertilizers.

With fertilizers high priced and scarce this year, it is more important than ever to use high-grade rather than low-grade goods. Plant food always costs the consumer more in low-grade formulae, and now there is an added argument for high quality—less freight space is required to move a given amount of actual plant food.

Help The Railroads.

When you order fertilizer and other spring supplies late, your agent or dealer orders out a minimum car:

He can't afford to wait for other orders; shipments caught in the rush of the season may be delayed too long. Fertilizer must be delivered before planting time.

When you order early, it gives your dealer or agent a chance to combine orders. He orders out his fertilizers in full capacity cars:

This means—not more business for him, but better service to you. The car shortage is relieved. One full car does the work of three minimum cars. The other cars can be used for hauling farm supplies—which helps you; for the carriage of food—which helps producer and consumer alike; and for transporting munitions and war supplies—which helps the Nation.

The railroads have a doubled importance in times of war. They are a vital part of our system of national defense. They deserve our full co-operation so they may give their best service to us and to our Nation.
